

AWS Customer Profile

Milestone Materials (Onalaska, WI)

PRODUCT

K-2 Kiosk

CHALLENGE

Milestone Materials is a large aggregate producer that manages many small to mid volume pits and quarries. Given the volume at the locations, Milestone could not justify having a full time scale operator to run these sites. They wanted to automate the ticketing and data collection process in order to be more cost-effective and efficient.

SOLUTION

In 2005, Milestone started implementing data collection kiosks at a number of their sites. Over the years, over 30 systems have been installed. Milestone is currently converting the older RSA equipment with cellular based K-2 kiosks that automatically sync data to their office after every transaction. This data is then imported into their ViewPoint software.
